LETTER OF RECOMMENDATION

15.11.2021

It gives me great pleasure in recommending one of my outstanding students **Mr. R. DHARANESH, ROLL NO:17AUL057** for his master's degree at your esteemed University. I have known him from 2018 onwards. I have handled subjects like Kinematics of Machinery, Strength of Materials, Design of Machine Elements, Principles of Management. Computer Integrated Manufacturing and Engineering Economics from Third Semester to Eighth semester. This gave me enough opportunity to interact with him and assess his potential. The medium of instruction in English.

He was a student very eager to gain knowledge not just by reading books but also through discussions beyond the scope of the subject. This makes him an eligible student to pursue his Master's **degree**. It is also worth to mention his level of confidence and diligence that he demonstrated in my classes was extraordinary. His presentations in my classes were always well prepared and well spoken.

He has good understanding of the basic principles and has the ability to apply them effectively to tackle the intricacies of any multi- faceted concepts. His temperament is that he is always calm and his etiquette, which shows his maturity level makes him stand out. He has always been a convincing person bearing good character. conduct and has been popular with faculty and his peer group.

With almost confidence in his ability, I strongly recommend Mr. R. DHARANESH for the Master's degree in your renowned university. I wish him all the best in his future endeavours.

Dr. C. JEGADHEESAN
ASSOCIATE PROFESSOR & HEAD
DEPT. OF AUTOMOBILE ENGG.
