## LETTER OF RECOMMENDATION

*(To whom so ever it may be concern)*

15.11.2021

This is certify that **Mr. R. DHARANESH, Roll No. 17AUL057** had undergone Three years degree course in B.E. Automobile Engineering at Kongu Engineering College, Erode during 2018 – 2021. He was very sincere, hardworking and academic activities were very good.

The medium of instruction for the above-mentioned full time Three years B.E. Automobile Engineering course was English, and all the examination were conducted in English language only. I had also analysed him in various extra, co-curricular activities conducted in our college and found his involvement, and sincerity was extraordinary.

His work on the extracurricular activities proves his enthusiasm on energy efficiency technology. He has successfully been part of the student chapter of Society of Automotive Engineers (SAE) and has represented college by participating in various events.

His communication and analytical skills have proved to be good which can be attributed to his thorough knowledge of fundamentals. He is a student who can shoulder any responsibility and can get accustomed to any situation.

I ascertain that he will prove himself to be a promising student with strong self-learning skill. So I strongly recommend **Mr. R. DHARANESH** for admission into your postgraduate program with the best possible financial assistance.

Yours Faithfully,

*P. Somasundaram*
